
ENVIRONMENTAL POLICY

Water Engineering Technology Sdn. Bhd are committed to provide a quality service in a manner that ensures a safe and healthy workplace for our employees and minimises our potential impact on the environment.

We will operate in full compliance with all relevant environmental legislations and strive to continually improve our environmental management system through the protection of the environment, including prevention of pollution and other specific commitment(s) relevant to the context of the organization.

Our Policy therefore, is to:

- Integrate the consideration of environmental concerns and impacts into our decision making and activities.
- Minimise our waste and then reuse or recycle as much of it as is possible.
- Minimise energy and water use within our buildings and processes in order to conserve supplies and minimise the consumption of natural resources.
- As far as is possible, purchase products and services that do the least damage to the environment.
- Train, educate and inform our employees about environmental issues that may affect their work, and to promote environmental awareness to encourage them to work in an environmentally responsible manner.
- Communicate our environmental commitment to clients, customers and the public and encourage them to support it
- Where required by legislation or where significant health, safety or environmental hazards exist, develop and maintain appropriate emergency and spill response programmes.
