
OCCUPATIONAL SAFETY & HEALTH POLICY

Water Engineering Technology Sdn. Bhd is to actively promote adoption of safe work practices which will ensure, as far as reasonably practicable, the health, safety and welfare at work of all its employees and interested third parties and the prevention of risks to the safety or health of others and to comply with all relevant legislations and other requirements.

We will continually improve our occupational health and safety management system through implementation of this policy including provision of instruction, training and supervision.

All directors, managers and supervisors have a responsibility for implementation of this policy.

All employees have a role in the health and safety programme and have duty to take reasonable care of themselves, their colleagues and anyone else who may be affected by their work activities to eliminate hazards and reduce OH & S risks.

All employees have an obligation to co-operate with others in the discharge of their duties relating to safety, health and environment.

The effectiveness of this policy and its implementation will be closely monitored and safety guidelines reviewed regularly, that includes a commitment to consultation and participation of workers, and, where exists workers representatives
